

# VVOB and SACE operate hand in hand for the further professionalisation of teachers nationwide

## National Conference

In September 2017, SACE, with the support of VVOB, organised a national conference on the Continuing Professional Teacher Development Management System that brought together important stakeholders (DBE, the Auditor-General, Unions, SAPA) to reflect on recommendations to improve and institutionalise the CPTD system.

**502 000 teachers reached in 2017**

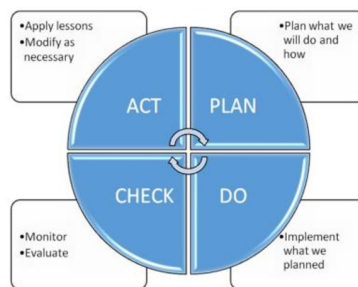

## Revision of evaluation rubrics

In July 2017, SACE and VVOB brought together evaluators to review the criteria to ensure that professional development programmes stimulate educators to reach all learners in the classroom and school leaders in their work station.

**8 SACE units have been trained on the use of the M&E framework**

## M&E Framework

In 2015, SACE embarked on a VVOB supported trajectory to critically revise their M&E framework in order to fulfill the reporting requirements through the Strategic Plan and the annual performance plan. Since then, all SACE units have been capacitated to work with the M&E framework.

Ms. Mokgalane,  
SACE CEO

"I really appreciate the role VVOB is playing. Honestly, we wouldn't be where we are. Especially the capacity that has been built. It's not only capacity for professional staff, but also for our admin staff. You have a balance from top to bottom and the other way around."

"Teachers have a big responsibility for the future of any society, and should be respected professionals. We are proud to assist SACE to better support these teachers in becoming professionals, and happy our partnership has become very strong over the years."

Dr. Theunis,
